Balajirekadi@gmail.com

As a software engineer with expertise in building enterprise level web applications, I specialise in utilising various technologies such as HTML, CSS, SASS, JavaScript, Angular, Rxjs, NgRx, ReactJS, Redux, and Redux Saga middleware to develop high-quality Single Page Applications. To ensure the quality of my app, I have experience in employing unit testing and integration testing frameworks such as Jasmine, Jest, and Enzyme.

Throughout my career, I have gained experience in all phases of the Software Development Life Cycle (SDLC), including Requirement Analysis, Implementation, and Maintenance, and I have extensive experience with Agile and SCRUM methodologies.

As a lifelong learner, I am always eager to acquire new knowledge and skills.

Work History

2021 - present

Senior Software Developer
M3BI, A Zensar Company

- As a Senior Software developer, I have built multiple web applications using ReactJs, React Redux, React query and occasionally using Angular and NgRx. I possess experience working with a microfrontend project, which has contributed to my expertise in developing highly functional and dynamic web applications.
- In addition to my experience with ReactJS & Angular, I have also been involved in designing and developing web components with StencilJS, which has provided me with a comprehensive understanding of web development.

2017 - 2021

Software Developer
Hexagon Capability Center India Pvt Ltd

- Worked predominantly in the frontend technologies
- Built Single Page Web Application called SmartBuild using Reactjs, Redux & Redux Saga in the frontend.
- Worked on Angular for over an year. Later SmartBuild App adapted to ReactJs.
- Built several UI components like modals, panels, grids, forms using best practices of ReactJs with Redux store.
- As a senior developer took responsibility of training freshers in the frontend technologies.
- Occasionally worked on building backend web APIs using C#, and Neo4j (GraphQL).

Achievements

A spot award for building a web component using stencilJS at M3BI.

Multiple POB (Pat on Back) awards as an appreciation for my work in Hexagon.

A Star Award given yearly was awarded as an appreciation for my work on migrating SmartBuild's frontend client from angularJS to ReactJS.

Awarded with project bonus for my extra contribution to the SmartBuild product at Hexagon.

Hobby Projects

Inovyte
Built an entire portfolio website for a startup called Inovyte. Built as an SPA using ReactJS with Routing and Redux store.
www.inovyte.com

TimeSticks
My own project built completely with vanilla javascript, html and css. TimeSticks is a widget like component built as an es6 module that simply shows time in a more graphical way.
